Researching Alta California Ancestors

Learn about key records and repositories to support your research of eighteenth and nineteenth century ancestors from present-day California and nearby regions. We will also cover important historical events and context to help identify additional resources for your research.

Lisa Medina is a professional genealogist and lecturer specializing in Mexican and American genealogy. With more than a decade of research experience, she has completed advanced training through ProGen, SLIG, and GenFed. Her work includes extensive research in Mexican civil, church, and archival records, both online and on-site in repositories throughout Mexico. She regularly lectures on Mexican genealogy and research methodology.
